## **Retraction Notice**

This article has been retracted by the publisher for the following reasons:

We regret to inform our readers and the scientific community that we are retracting the article titled "Emission of electromagnetic rays from mobile phones cause dysfunction of thyroid gland" with the DOI [doi.org/10.18231/j.ijcap.2024.015] published in [Indian Journal of Clinical, Anatomy and Physiology]. A serious conflict of interest was identified, which was not adequately disclosed by the authors during the submission and review process. The undisclosed conflicts have compromised the article's scientific objectivity and impartiality.

Furthermore, it has come to our attention that a same article, has been published in another journal [International Journal of Science and Research (IJSR)] - DOI: [DOI: 10.21275/ES24515081512]. This dual publication of substantially similar research without proper disclosure and permission violates the principles of responsible publication.
